Creativity and Inventions

Editorial

A wit caustically remarked that getting information from the internet is like trying to drink from a Fire Hydrant to quench thirst. There is too much that makes it useless. This predicament aptly sums up the condition of the present age. There is abundance around. Yet there is paucity. This contradictory situation can be corrected only by an intelligent curiosity of all things around. To see, to seek, to analyse are the hallmarks of intelligence. The theme of this magazine, Creativity and Inventions is woven around the impelling spirit of intellectual curiosity of young minds.

In turning the pages of this magazine, one finds in nutshell inventions and discoveries that changed the world. They have become so ubiquitous that they no longer raise our curiosity. From Pen and Sim Cards, to Butter and Chocolates, there is an array of articles which throw light on the creativity of human mind. Any reader will be struck by the simplicity, variety and interest that are evoked in the young minds unlike a person's futile attempt trying to drink from a Fire Hydrant. Slow and steady stream of information that quenches the intellectual thirst is the speciality of this magazine on Creativity and Inventions.

Creativity

God Inspires

Man Imitates

This parrot is, in fact, a woman whose body has been cleverly painted to resemble the tropical bird.

*To be Creative
Is to unleash the fire within
That at first simmers slowly
Until it can contain itself no more*

*To be Creative
Is to watch the fire carefully
Guarding its flame
When the roar needs to be heard*

*To be Creative
Is to listen to the call of the fire
And release the fear
And joyfully watch it dance*
